PROFILE

Self-taught developer in continuous training, with a real e-commerce application in production and hands-on experience operating business-critical systems. I combine AI-assisted web development, business awareness, problem solving and autonomous work. I am seeking a remote junior role in development, application support or systems, with Spanish-first collaboration or written English communication.

TECHNOLOGIES AND TOOLS

Development: HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Electron, API integration
Backend and data: Supabase, PostgreSQL/SQL, SQLite, Drizzle ORM, Auth, RLS, Storage
Workflow: Git, GitHub, Netlify, Cloudflare D1, testing, VS Code, Claude Code and Codex
Operations: SIACOOOP, batch files, payments, collections, reconciliations and support

SELECTED PROJECTS

Velvet Hogar | Real e-commerce application in production 2026

velvethome.netlify.app

- Developed, tested and deployed a responsive online store for a family business using Next.js, React, TypeScript, Supabase, GitHub and Netlify.
- Built a public catalog and admin panel, authentication and roles, product variants, inventory, cart, orders, customers, validated checkout and expiring reservations; resolved real production issues.

ACORIA Gestión v0.18.0 | Multi-company SaaS / ERP / POS In development

- AI-assisted development of a React/TypeScript and Electron Windows application with local SQLite, Drizzle ORM and central synchronization prepared on Cloudflare D1.
- Built and tested a persistent core for users/roles, products, inventory, POS, sales, current accounts, cash, backups, Excel/CSV imports, hardware and offline operation; produced a working Windows installer.

EXPERIENCE

Administrative Clerk B, operations and systems | Cooperativa de Provisión de Agua Potable de Oriente Ltda.

10 Jul 2025 - Present

- Daily SIACOOOP operations covering payments, collections, accounts, member records, case follow-up, customer service and complaint resolution.
- Processed Red Link payment batches and direct debit files: preparation, imports, bank submissions, response files, accepted/rejected items and reconciliations.
- Handled internal systems, data processing, operational controls and basic office technical support.

Plant operator | Molinos M&C S.R.L. Jun 2019 - Dec 2022 Verifiable reference

- Operated packaging machinery, weighing and quality controls; maintained daily production records, loaded and stacked bags, and consistently met team goals.

EDUCATION AND LANGUAGES

Software development: continuous self-directed learning through real-world projects

Education: completed secondary education; Electrical Installer course, Instituto Técnico La Piedad (2017)

English: intermediate written communication; speaking currently in training
